## CONFIRMATION OF STRENGTH CALCULATION

### CONFOOT LTD

has implemented a documented strength calculation applying guidelines of standards  
*SFS-EN 1993-1-1, SFS-EN 1993-1-8 and SFS-EN 1494.*

Product: **ConFoot ® CF-leg**  
(19ST17)

#### **Calculation assumptions and exclusions:**

- Rated load / one CF -leg: 8500 kg
- Safety factor for load used in calculations: 1,5
  - Safety factor of 1,5 accounts for dynamic effects and the static test. This factor does NOT account for wind loads
- Height of the ConFoot CF -leg: 1448 mm
- Calculations are only valid when the CF-leg is set on surface which has friction coefficient more than 0,1.

#### **Calculation results:**

- ConFoot CF -leg can withstand the rated load with safety factory 1,5 without any plastic deformation
